

MRI FACILITY DIRECTORY

Name of Institution: **The Ohio State University
Wright Center of Innovation in Biomedical Imaging**

Institution's Address: Martha Morehouse Pavilion
2050 Kenny Road
Columbus, OH 43220

Web Site Address: www.radiology.osu.edu

Can accommodate both Pre-Clinical and Clinical research projects.

Contact Person: Michael Knopp, MD, PhD

Phone: 614-293-9998

Fax: 614-293-9275

e-mail: knopp.16@osu.edu

Below is a brief narrative of the institution's MRI capabilities. The following information was provided by the institution. BioPAL has compiled the MRI facility directory to aid researchers access MRI services. The listing is not an endorsement by BioPAL.

The Wright Center of Innovation in Biomedical Imaging is a premier MRI facility within The Ohio State University that focuses on innovation in imaging for research, clinical trials, preclinical trials and patient care in both human and animals in our dedicated, fully JCAHO compliant MR scanners in all field strengths including 7 Tesla. All advanced capabilities from neurofunctional imaging to equine imaging are in place. The environment is further integrated with an imaging corelab providing all levels of data analysis, analytical and reading services. The facility is performing a large number of clinical trials from Phase 0 to Phase IV, as well as integrated translational trials with preclinical and clinical components. Furthermore, the Wright Center of Innovation environment includes PET/CT, SPECT/CT and MRI/PET facilities that enable extensive multi-modality and correlating imaging studies. Additional special capabilities have been established for response assessment with a dedicated staff to support IRB and compliance to TCP and other regulations.

The Leading Provider of MRI Contrast Reagents for the Research Community
